Safyr 8.2 Release Notes

October 2026

© Silwood Technology Ltd

Introduction

These release notes outline the changes introduced with the Safyr 8.2 release.

The main new capability of version 8.2 is the extension of Safyr's capabilities to encompass not only CDS Views but also CDS View Entities.

It also provides several bug fixes and minor improvements.

Installation Considerations

Installation

Run the Setup program to install. An existing Safyr install will be upgraded.

Please make a backup of the SafyrSettings.xlsx file before installing, if you have made any changes to the previous Safyr delivered version. Make sure to merge the changes you have made into the new version.

Preparing the Source System for Extraction

SAP CDS	Install the latest SAP Transport if upgrading from version 8 or earlier
SAP S/4HANA	Install the latest SAP Transport
SAP BW	Install the latest SAP Transport if upgrading from version 8 or earlier
SAP BW on HANA	Install the latest SAP Transport if upgrading from version 8 or earlier
Others	No change

Re-extraction from Source System needed

SAP	Not required unless upgrading from 7.6 or earlier
SAP S/4HANA	Required to take advantage of 8.2 features for CDS View Entities
SAP BW	No change
Salesforce	No change, unless the latest API version is required
SuccessFactors	Not required unless upgrading from 7.7 or earlier
Others	No change

Safyr Repository

Update script will remove ViewType column from Primary Keys.
